Zoll's AED Plus Defibrillator

Now fully 2010 Guidelines-compliant!

When a cardiac arrest occurs, the fact is that only half of the victims will need a shock. The other half require high-quality cardiopulmonary resuscitation (CPR).

You deserve an automated external defibrillator (AED) that helps you all the time, one that can actually see when you are doing CPR and provide help. You need more than just commands without assistance. That's not smart, and it's certainly not help.

Only ZOLL®'s AED Plus® features Real CPR Help,™ a tool that is able to actually see what you are doing and provide feedback to help you do it well. Audio and visual prompts help you rescue with confidence and clarity unmatched by any other AED.

- Not pushing hard enough? It will tell you to push harder.
- Pushing hard enough? It will say, "Good compressions."
- Not pushing fast enough? A metronome will lead you to the right rate.
- It will even show you the depth of each compression. In real time.
- Not yet started? The AED Plus will tell you again to get started.
- Compressions stopped? It will tell you to continue.

CPR Feedback

ZOLL believes an AED should not just deliver a shock. It should also help the rescuer provide high-quality CPR. That's why you need ZOLL's AED Plus with Real CPR Help.

The Chain of Survival

The best way to increase the chance of saving sudden cardiac arrest (SCA) victims is to remember and follow every link in the Chain: Early Access, Early CPR, Early Defibrillation, and Early Advanced Care. Every step helps save lives. Any break in the Chain compromises survival.

Ordinary AEDs only defibrillate. Rapid defibrillation is a critical intervention to improve survival, but it is not enough. While roughly half of unresponsive collapsed victims need defibrillation, every one of them needs CPR.

Following the Chain of Survival requires more than just attaching electrodes and delivering a shock. From checking responsiveness, summoning help, and doing an "ABC" assessment (Airway, Breathing, Circulation) to CPR and defibrillation, the ZOLL AED Plus with Real CPR Help helps guide the rescuer through the entire effort to rescue SCA victims.

The AED Plus Fully Supports the Rescuer

By focusing on the full Chain of Survival and providing Real CPR Help, the AED Plus is the first and only Full-Rescue AED.

The AED Plus offers:

- Real CPR Help for rate and depth of compressions.
- Support for the complete Chain of Survival.
- Help to all victims of SCA, even those for which no shock is advised.
- A one-piece electrode pad for fast and accurate placement.
- Our AEDs use consumer lithium camera batteries available from retail stores.
