- 2 x Ceramic Brake Pads MADE IN CANADA

ADDITIONAL INFORMATION:

ROUNDED SLOTS are designed to keep face of brake pads clean over time.

CHAMFERED DRILLED HOLES improve heat dissipation during heavy braking, also prevents cracking and reduces excessive wear on brake pads. Each drill hole is chamfered for a smooth linear transition at the edge. This reduces stress risers for improved durability.

FREE! SILVER ANTI-RUST ZINC PLATING is the best way to protect rotors from

rust and damage. GOLD and BLACK zinc plating available for upgrade.

SPECIAL, NON-DIRECTIONAL FINISH enhances braking experience by reducing noise and increasing smoothness of stops.

MILL BALANCED for a smoother braking application and vibration reduction
