NAPOLEON®
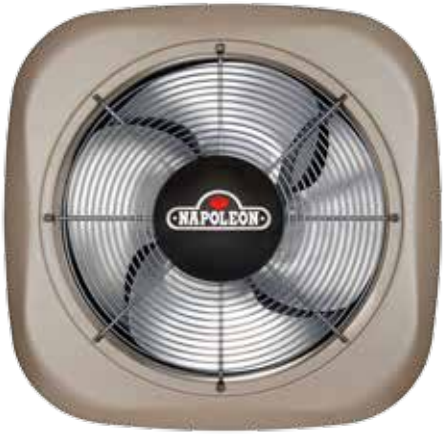
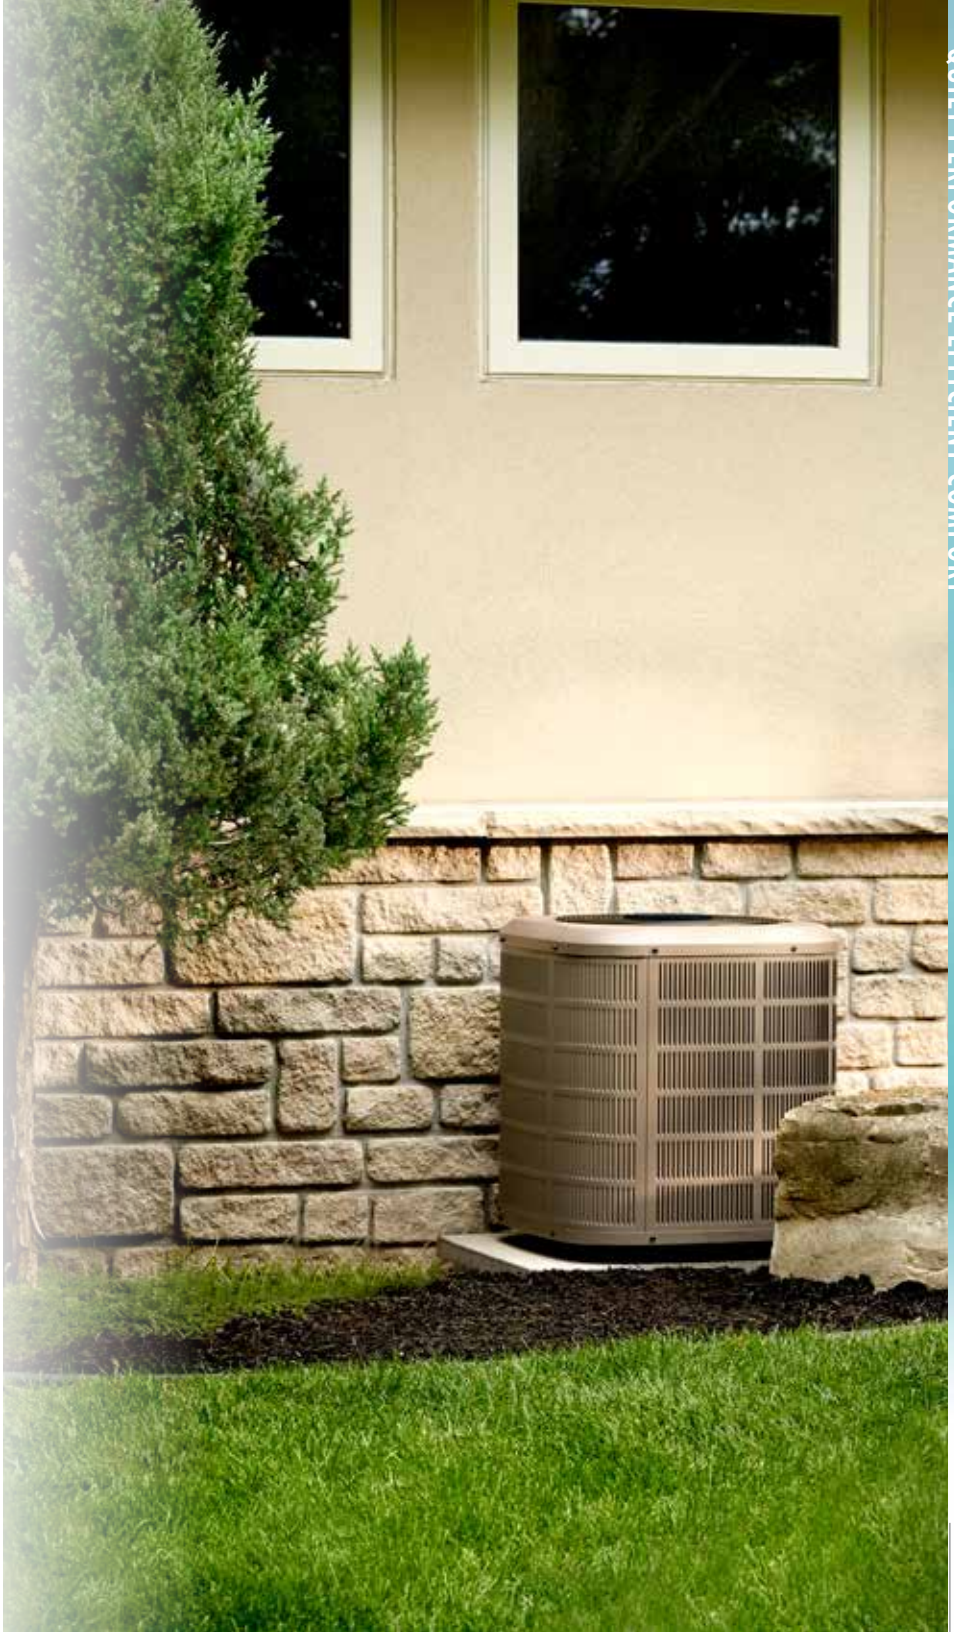
HEATING & COOLING

SWEPT FAN BLADE TECHNOLOGY

Napoleon air conditioners are made with modern fan blade technology. The unique swept shape of the blades make Napoleon air conditioners quiet as they efficiently provide increased air flow. With quality and longevity in mind, Napoleon's swept fan blades are made with a plated steel hub and aluminum blades for long lasting durability.



Napoleon 1.5 and 2 ton air conditioners have a 4 blade fan that is designed to meet the cooling needs of the unit - 2.5 through 5 ton air conditioners use a larger 2 blade fan that provides the increased air distribution required for larger units.

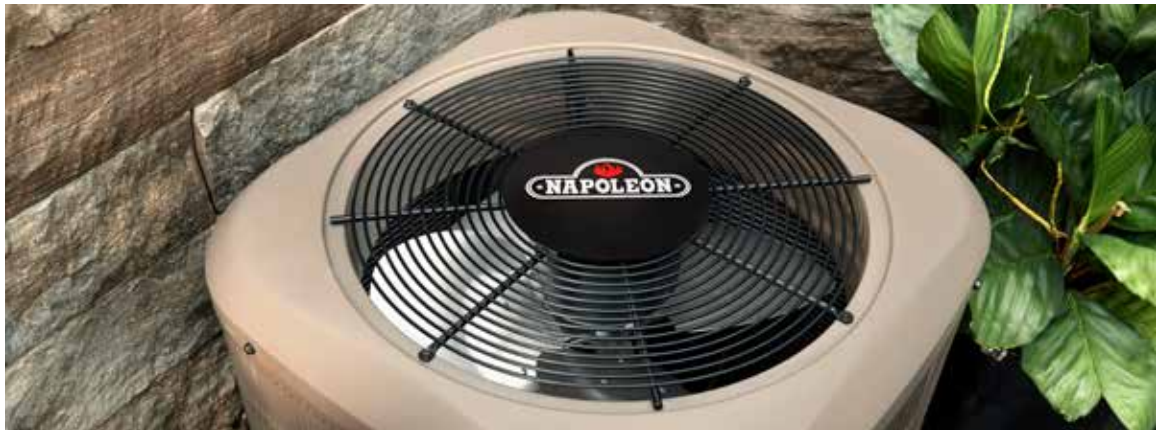


PROUDLY ENGINEERED AND MADE IN CANADA FOR NORTH AMERICAN CLIMATES

ENERGY SAVINGS AND COMFORT

When you're scrambling to meet the countless demands of your day, coming home and struggling to achieve a comfortable balance of your home's temperature is the last thing you should have to worry about. Napoleon's 13 SEER (Seasonal Energy Efficiency Ratio) central air conditioner will easily maintain a desired temperature. With quiet operation features and a natural taupe colour, Napoleon's 13 SEER air conditioner will effortlessly blend into the landsape of your home.

Napoleon's 13 SEER air conditioner is made with superior eco-friendly technology and design. Backed with a 10 year limited compressor and parts warranty, we guarantee home comfort and satisfaction throughout the summer seasons for years to come.



EASY INSTALLATION & MAINTENANCE

- Features a permanently lubricated PSC - Permanent Split Capacitor motor achieving prompt start up without excessive noise levels
- Motor assembly is removable from top of unit for fast and easy servicing
- Service valves and refrigerant connections are located outside the cabinet for easy accessibility and servicing
- Electrical connections are easily accessible through a removable service panel

ENVIRONMENTALLY RESPONSIBLE

Napoleon air conditioners are made with the environmentally conscious, chlorine-free refrigerant R-410A. Refrigerants are liquids that are housed within the coils of your air conditioner to cool and dehumidify your home. By using a refrigerant that is chlorine-free, Napoleon air conditioners do not contribute to ozone depletion and offer higher SEER (Seasonal Energy Efficiency Ratio) ratings. In addition, R-410A refrigerant reduces power consumption and increases the durability of your compressor, extending the life of your Napoleon air conditioner.

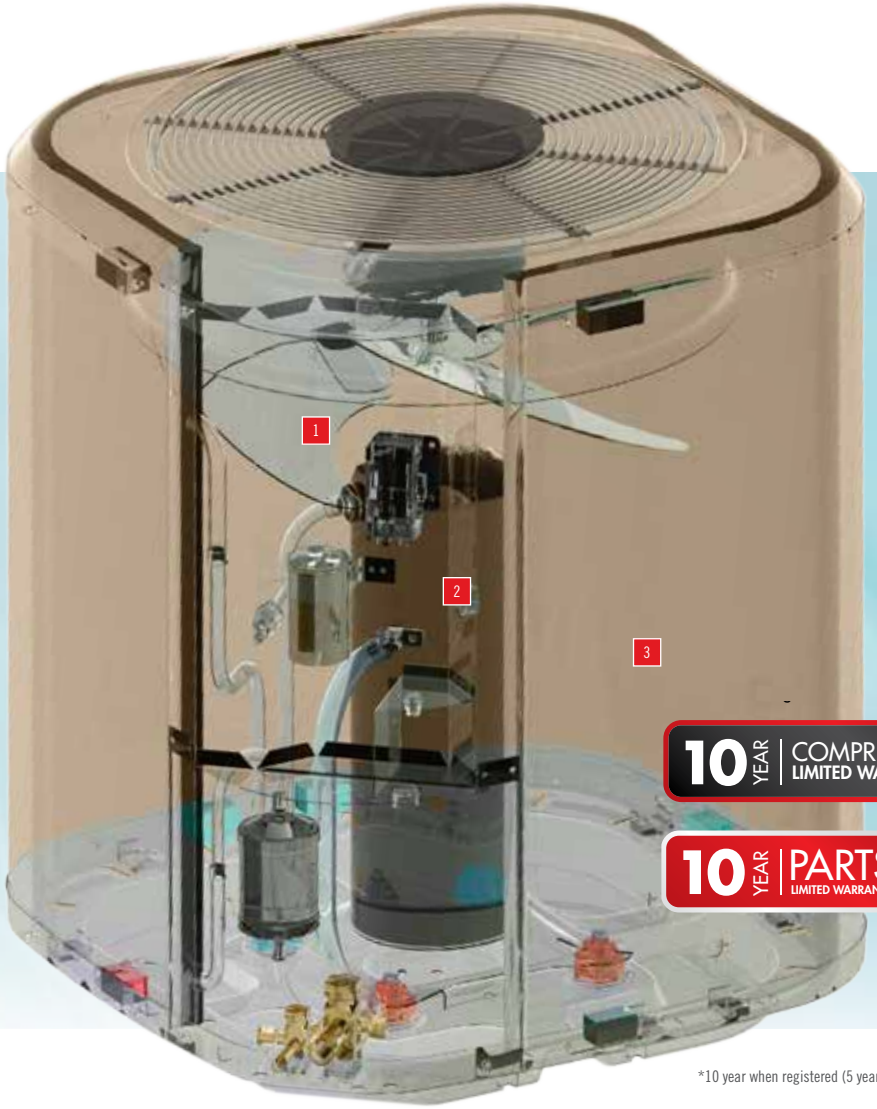
ECO-FRIENDLY TECHNOLOGY



10 YEAR | COMPRESSOR LIMITED WARRANTY

10 YEAR | PARTS LIMITED WARRANTY

*10 year when registered (5 year standard)

1. Swept Fan Blades

- Contoured blades provide quieter operation
- Produces efficient air flow
- Fans are made up of 4 or 2 fan blades to accomodate the cooling capacity of the unit

2. Scroll Compressor

- Industry leading Copeland® compressor
- Low vibration creates quieter operation
- Contains built-in safeties

3. Louvered Side Panels

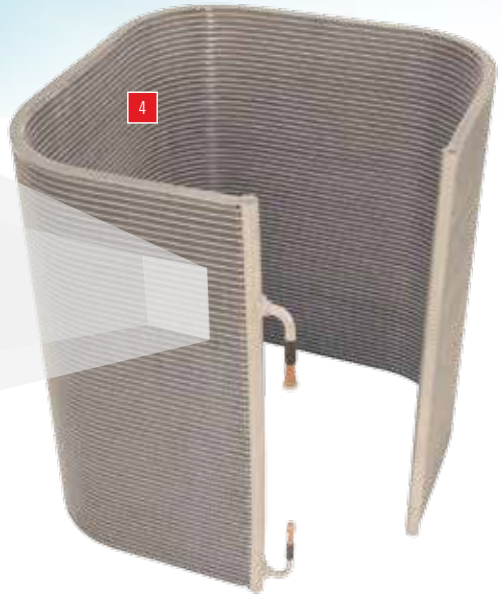
- Louvered side panels protect the inside of your Napoleon air conditioner while allowing the right amount of air flow
- Powder coated cabinet panels withstanding 1000 hours of salt spray testing

4. Micro-Channel Coils

- Coils are all-aluminum to last longer then those made with copper
- Coils are compact to allow for smaller air conditioner size

*See warranty for details

R-410A refrigerant efficiently runs through the curved micro-channel condenser coils



ADVANCED MICRO-CHANNEL COIL TECHNOLOGY

Napoleon Air Conditioners are made with superior micro-channel condenser coils. Condenser coils wrap around the inside of your air conditioner and house the refrigerant. Napoleon's micro-channel condenser coils are compact, allowing for a smaller air conditioner size while using substantially less refrigerant. Napoleon microchannel condenser coils are all aluminum, easy to maintain and will last longer then those made with copper.
