

⚡ EnPowered | Ontario's Time-of-Use Pricing vs. Market Rate

Time-of-Use pricing is relatively cheap at night but very expensive during the day. A market rate is much cheaper during the day when most businesses are open.

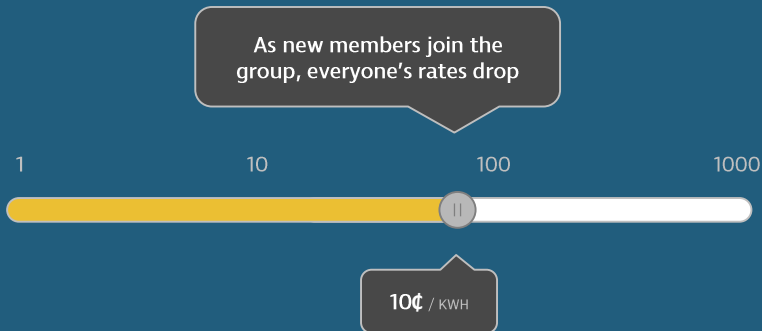

EnPowered | Group-buying can offer low day-time rates

If you use more than 50% of your electricity between the hours of 7am and 7pm, then you are overpaying for your electricity.

*On-Peak prices are currently at 18.0 ¢/kWh and continue to rise.
An EnPowered market rate can drop your supply cost by up to 40%*

*Get access to the lowest rates in the market by joining a buying-group.
There are **no** cancellation fees, **no** commitment, **no** worries.*

Lets work together to drive down costs for everyone.

**indicative only, actual rates vary by region*
