STRETCH CEILINGS

Letter from CEO:

We, at Laqfoil Ltd. are here to make your homes and offices well-decorated, presentable and unique places.

Today, we can proudly offer you an extensive range of product options not only in stretch ceilings and wall décor, but also in any aspect of a new development or existing improvement. From ceilings to 3D forms and structures, from design to manufacturing and installations, Laqfoil Ltd. offers it all.

Environmental concerns are no more considered a myth but a sure shot reality, and let me inform you that we at Laqfoil are concerned. We are trying to play our role in the protection and sustainability of our ecosystem. That's why we only use materials and techniques that are completely safe for the environment.

North American market is highly demanding and diverse. Laqfoil Ltd. is one such firm, that has managed to gain absolute attention from consumers, and positive reputation with diligent efforts and excellent craftsmanship. We are regularly employing and developing latest techniques and constantly improving, by integrating new products and technologies.

I would like to extend my deepest appreciation to all of our clients for believing in us and giving us a chance to prove our passion, professionalism and dedication. Without you, we wouldn't be today where we are.

Thank you all for believing in us.....

Jack Verchenko

CEO

ABOUT US

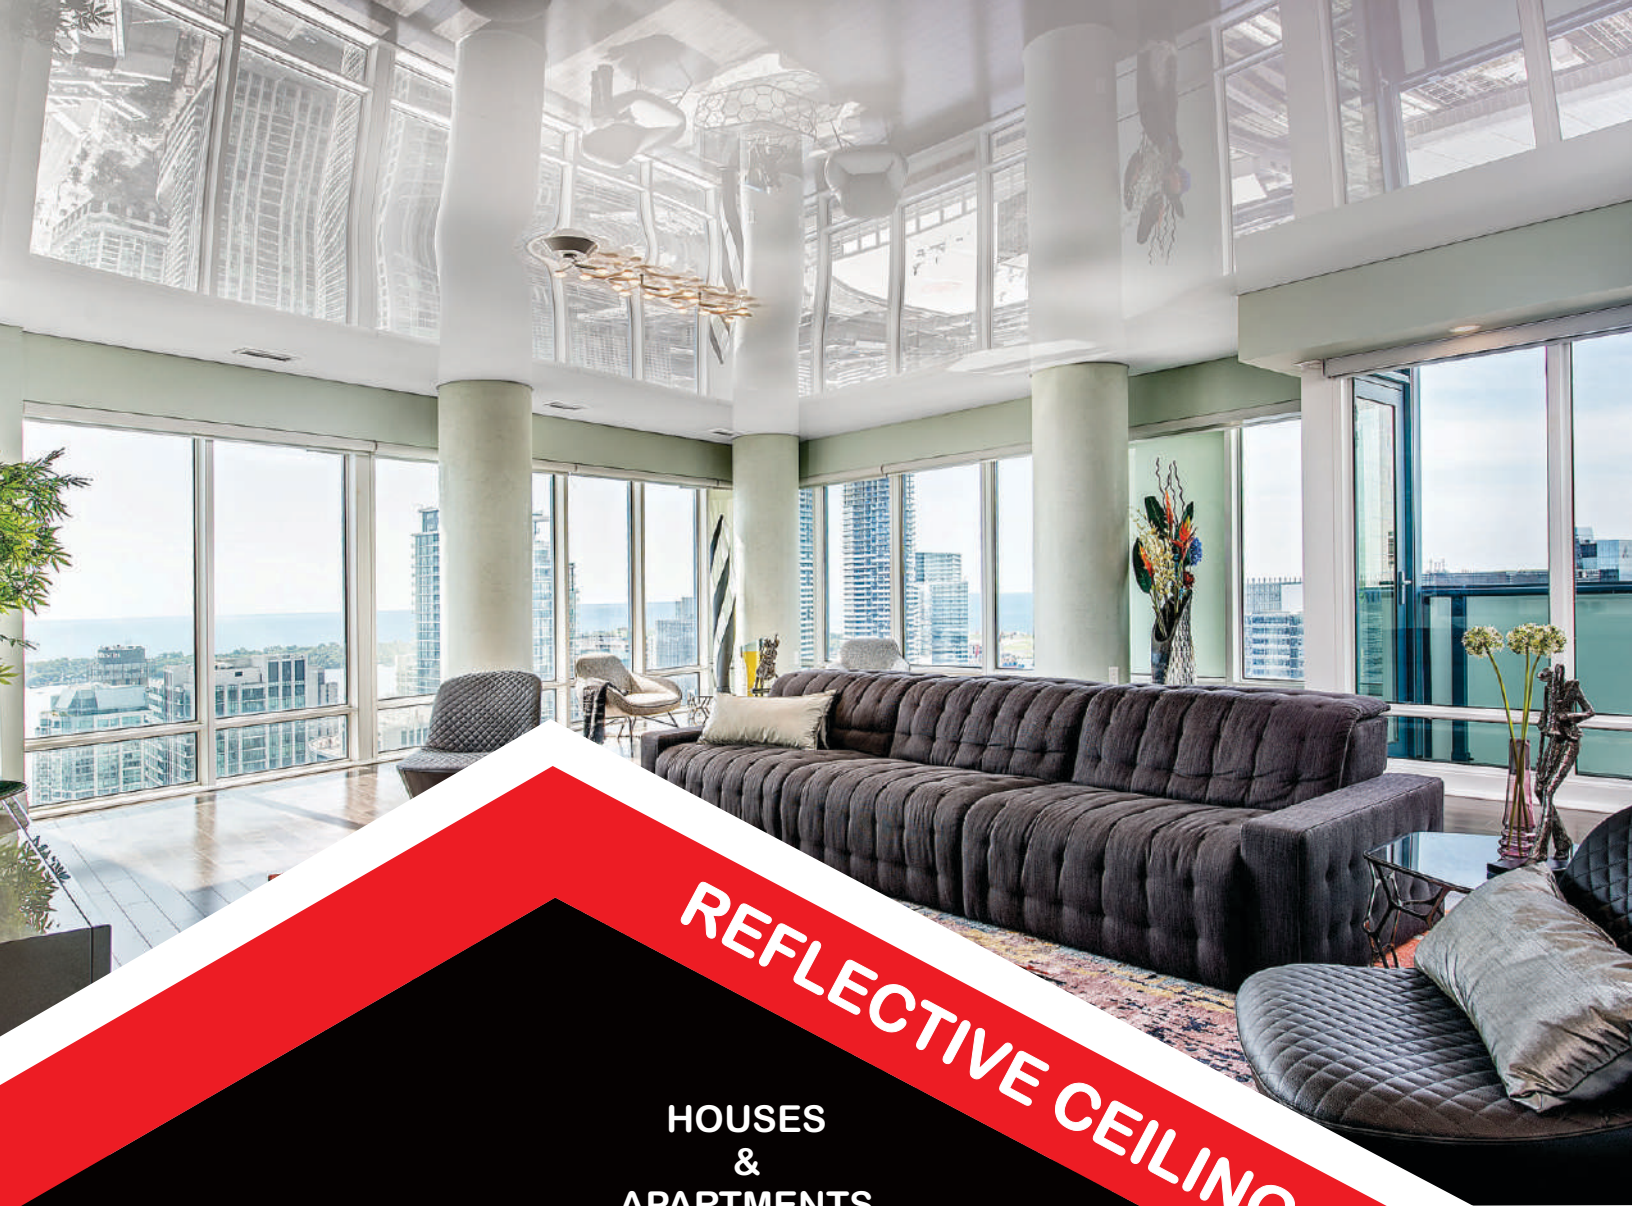

Laqfoil Ltd. is North America's leading manufacturer of Stretch Ceilings and Technologically Related Products. Formerly Universal Stretch Ceilings, Laqfoil Ltd. has rebranded to meet worldwide market demand and rapid expansion in home and business design and décor. Professionally trained and certified Laqfoil's dealers can be found in major North American centres, and our growing international network has quadrupled since 2010, including 27 authorized representatives in Northern Europe, Asia and the Middle East.

Homeowners, architects, designers, builders, investors, and corporations use our innovative products to beautify and modernize their interiors. We are proud to include Trump International Hotel and Tower Toronto, Best Western Hotels, Sport Check, Toronto Safety Standard Association, Nike, Remax Real Estate, Woodbine Mall Holdings, The Taylor Group, Air Canada Centre, Home Design Expo Center, and many other prestigious commercial brands among our customer list.

We offer an incredibly varied selection of colours and finishes, and a vast variety of printed options in our Stretch Ceiling and wall products. Our services include turn-key design, production, delivery, and installation of our strong, light, and durable products that come with a 10-year manufacturer's warranty. Laqfoil Ltd. products are soundproof, flame, water, mould, and fungus resistant, that save energy and reduce the carbon footprint of homes and businesses.

Our knowledgeable, experienced, and licensed staff offer professional support to our clients in the architectural and design phase, and our specially-trained production, quality control and installation experts deliver superb finished Stretch Ceiling products. We offer a quick, cost-effective installation with a minimal amount of mess and dust or disruption to your space.

Laqfoil Stretch Ceilings has completed over 230 residential and 140 commercial projects, and delivered over 280,000 sq. ft. of Stretch Ceiling and wall printed covers with our exclusive non-allergenic, non-flammable, waterproof, modified polyvinyl-based materials. Our products are safe and fully certified under the National Building Codes of Canada and the U.S., and widely used in both, residential as well as commercial applications.

REFLECTIVE CEILINGS

Laqfoil Reflective Ceilings also known as High Gloss Stretch Ceiling is one of the most popular products within Stretch Ceiling Industry.

The reason for it is that the final glossy coating on the material makes it almost as reflective as a mirror.

The depth of reflectiveness determines by the color of chosen material. Darker membrane shows higher percentage of reflection. Such texture is very popular within low height places, because not that it only dissolves the surface, but also reflects everything around the room. Such effect significantly enlarges the area visually, providing illusion of an endless height.

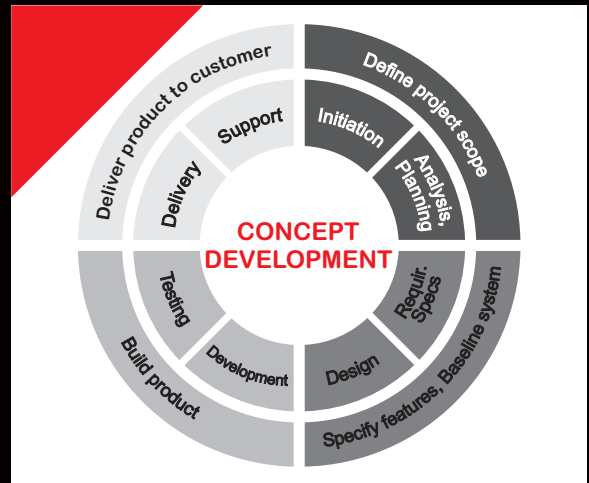

PRINTED CEILINGS

One of the most popular Laqfoil's products on today's market is Printed Ceilings. Thanks to highly innovative printing technology, we can now transform any type of graphics or artwork directly onto Laqfoil Stretch Membrane. Whether it is a print on reflective high-gloss material or classical canvas or even translucent material, with an option of backlit, we open entirely new perspectives for our clients, combining both, structural finishing and decorative enhancement. Up to 16 feet wide and 164 feet long artwork in one piece, without any seams or connection, would do a miracle. Wonder what it is going to look like? Caesar's Palace, Grand Canal at Venetian Resort in Las Vegas, Air Canada Center in Toronto, Sultan Qaboos Yoth Complex Center in Oman, Woodbine Shopping Center in Toronto and many other projects across the Globe, will surely stand out by this revolutionary technology. Imagination is the limit. Carefully and individually chosen image, can easily increase the height of your place, change an atmosphere, deliver the message and simply enhance the look of a space. And don't forget about ideally finished ceiling, that is at the same time conceals all imperfections on existing surface and resolves all of your concerns.

No one can ignore the startling and invigorating impact of lights on the ceiling.
If you embed lighting effect on your ceilings the design impression becomes two-fold.

Laqfoil translucent material is used to introduce lighting effect by
diffusing and softening lights. If there is a print on the film, then it
enhances the image extraordinarily.

Translucent fabric creates an ever-lasting ambiance and enhances
the mood of the room or any given space. The fabric can be used with
integrated lighting for adding a dramatic and elegant effect.

Not only Laqfoil translucent material
can transmit up to 75% of the light but
also can carry the message in a way
of an artwork printed on it.

BACKLIT CEILINGS

WE ARE PROUD OF:

...and many other prestigious commercial brands among our customer list.

PRINTED MURALS

Consider walls of your home, workplace or exhibits like a canvas and be creative to the fullest of your ability because we can install virtually all types of art printed murals. Such murals can be based on any type of artwork, custom file or corporate logo, printed on Laqfoil's stretch ceiling high gloss, matte or translucent finish membrane and then directly installed on your chosen surface, whether it is a wall or ceiling. These are long lasting and removable prints that can be applied in any shape, length and location. From hallways to kid's rooms, lounges to master bedrooms and guest areas, swimming pools, offices, malls and retail shops, wall murals are suitable for any environment. You can even decorate your kitchen and bathroom with this amazing idea. As wide as 5 meters or 16 feet with unlimited length, Laqfoil's printable membrane can conceal your unattractive or imperfect surface, by delivering the whole new look to the place. Using patented Laqfoil's frame structure, installed product could be removed, reinstalled or even repositioned as many times as you might need.

When we are talking about high humid facilities, such as pools, spas, health and fitness clubs, Laqfoil Stretch Ceiling Product is ideal solution to cover existing walls or ceilings.

Not only we are able to protect structural from high dampness, chlorine, sulphur and other corrosive evaporations, but also to enhance the interior look of the place.

Laqfoil Stretch Ceilings totally satisfy all Building and Health Code requirements for such facilities. It is not afraid of dampness, do not accumulate condensates and preserve their perfect decorative appearance for a long time.

The product that we offer is completely waterproof, and does not have static, therefore it doesn't attract mould, odour, steam and does not require any type of maintenance.

MULTILEVEL CEILINGS

Laqfoil Multilevel Stretch Ceilings is a creation of multiple surfaces designed on different levels or shapes.

Such effect is achieved by finishing one or combination of few different types of stretch ceiling materials, as well as additional framing. Such concept might be priceless for places that have uneven surfaces or exposed variety of communications and structural necessities.

Framing around thus obstacles and then concealing it by an individually chosen material, can not only serve the purpose, but also achieve aesthetically appealing effect.

Bulkheads, center pieces, light coves or ceiling communications, may easily be complimented by Laqfoil, using its own, unique stretch ceiling technology.

Acoustical improvement is probably as much important part of an interior, as a visual design. Laqfoil's acoustical product is used to reduce the intensity of sound waves, so that the place's environment becomes welcoming, soothing and comfortable for everyone. The material performs its job of reducing noise by absorbing some portion of the sound energy via small perforation that is preliminary applied to its surface. The acoustic fabrics are, thus, micro-perforated and contain synthetic batting due to which you can expect high level of acoustic performance. It is very useful within large and loud areas, such as homes, offices, churches, airports, museums, music venues, conference halls, etc. Laqfoil's acoustical material is printer friendly and allows us to imprint any type of graphics directly onto it.

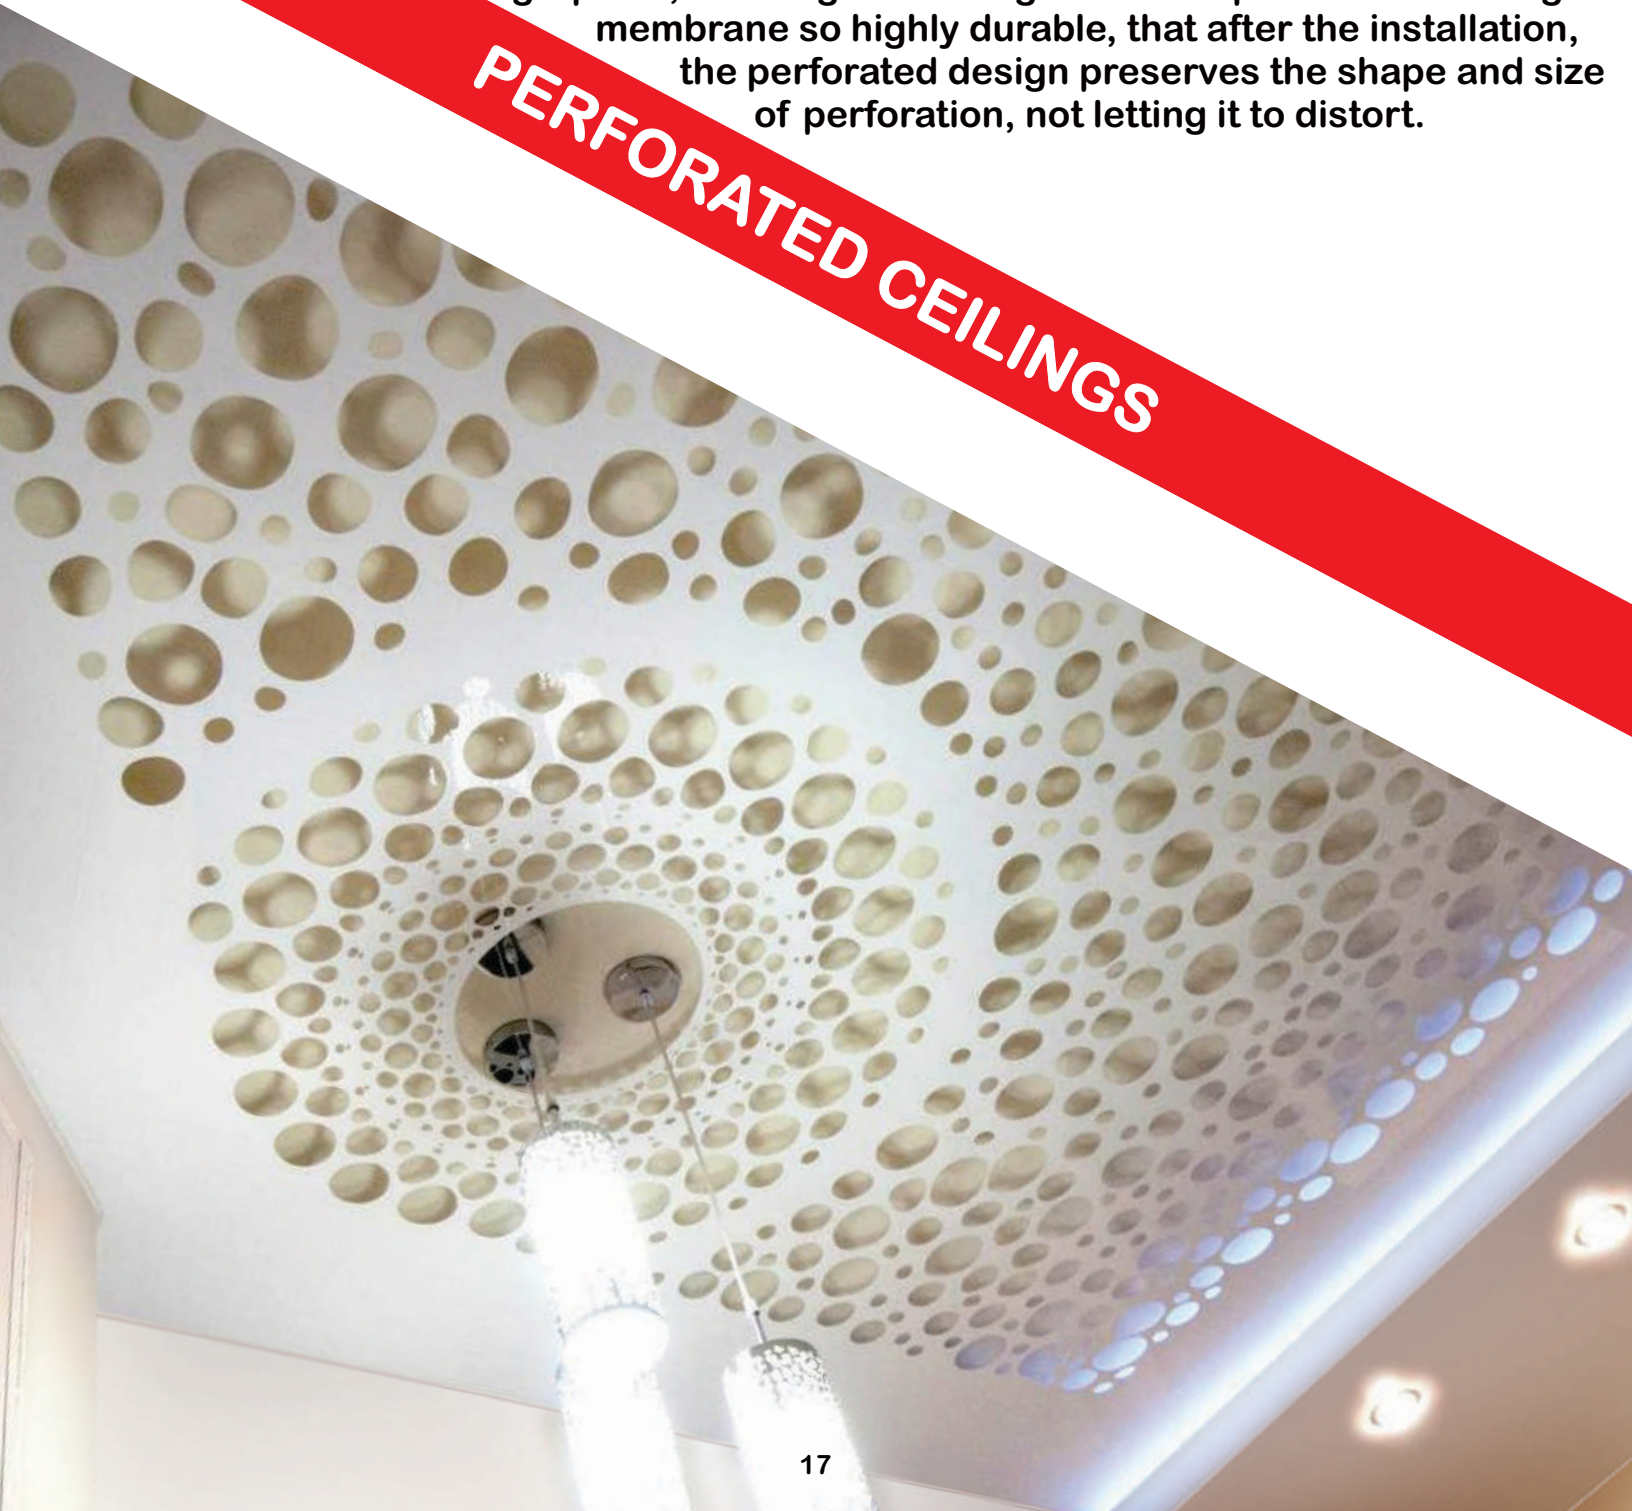

Laqfoil Perforated Stretch Ceilings is a conceptually new production line that allows us to laser-cut any shape, form, size or design of perforation directly onto chosen membrane.

This unique technology in combination with professional skills of our production staff, allows us to transform the chosen design through the hi-tech equipment onto Laqfoil membrane. Such ceiling would look amazing in combination with another layer of the material installed directly above the finishing level.

Minimal space in between the membranes allows the installation of a backlight, which would shine through the face layer's perforated graphics, creating a stunning effect. Laqfoil stretch ceiling membrane so highly durable, that after the installation, the perforated design preserves the shape and size of perforation, not letting it to distort.

PERFORATED CEILINGS

PERFORATED CEILINGS

STARRY SKY

Starry Sky is one of the most beautiful products offered by Laqfoil. It truly brings the sense of undiscovered galaxy into your room. Ever dreamed of sleeping under stars, looking for zodiac signs, discovering space and planets? Now you can have it all inside of your place.

Unlimited design, unique creativity, exclusive vision can now become the reality with Laqfoil's starry sky technology. From simple print of a night sky to integration of fiber-optics or combination of both, could relocate you into unforgettable atmosphere of a real nature.

3D STRETCH CEILINGS

Laqfoil three dimensional or 3D stretch ceiling is basically a 3D frame enveloped within a specially prepared PVC-based membrane. 3D ceilings and fixtures make your interior environment appear extraordinarily inviting, exceptionally creative and aesthetically appealing. The most beneficial aspect of choosing to install 3D stretch ceilings is that you can get them shaped and sized in practically endless colors and designs. In fact these ceilings are available in over 280 shades. The finishing range is also extremely diverse as you can select from matte or high gloss, satin or metallic, translucent and brushed suede, etc. With the addition of LED lights and backlights, your 3D ceilings can get a complete different impact there by enhancing the impression and 3D effect even more. These visually appealing fixtures can also embed acoustical implants.

Laqfoil 3D stretch ceilings offer limitless frames and dimensions and the vinyl membrane gives them a very smooth look. If you want a printed image such as that of sky with stars then it can be translucent or opaque and with backlights, the image becomes amazingly realistic. These are ideal ceiling option if you want to add a touch of luxury and extravagance or innovativeness to a room. Drawing rooms, bedrooms, malls, retail outlets, kids rooms, lounges, cafes and restaurants are key locations where 3D stretch ceilings would look best.

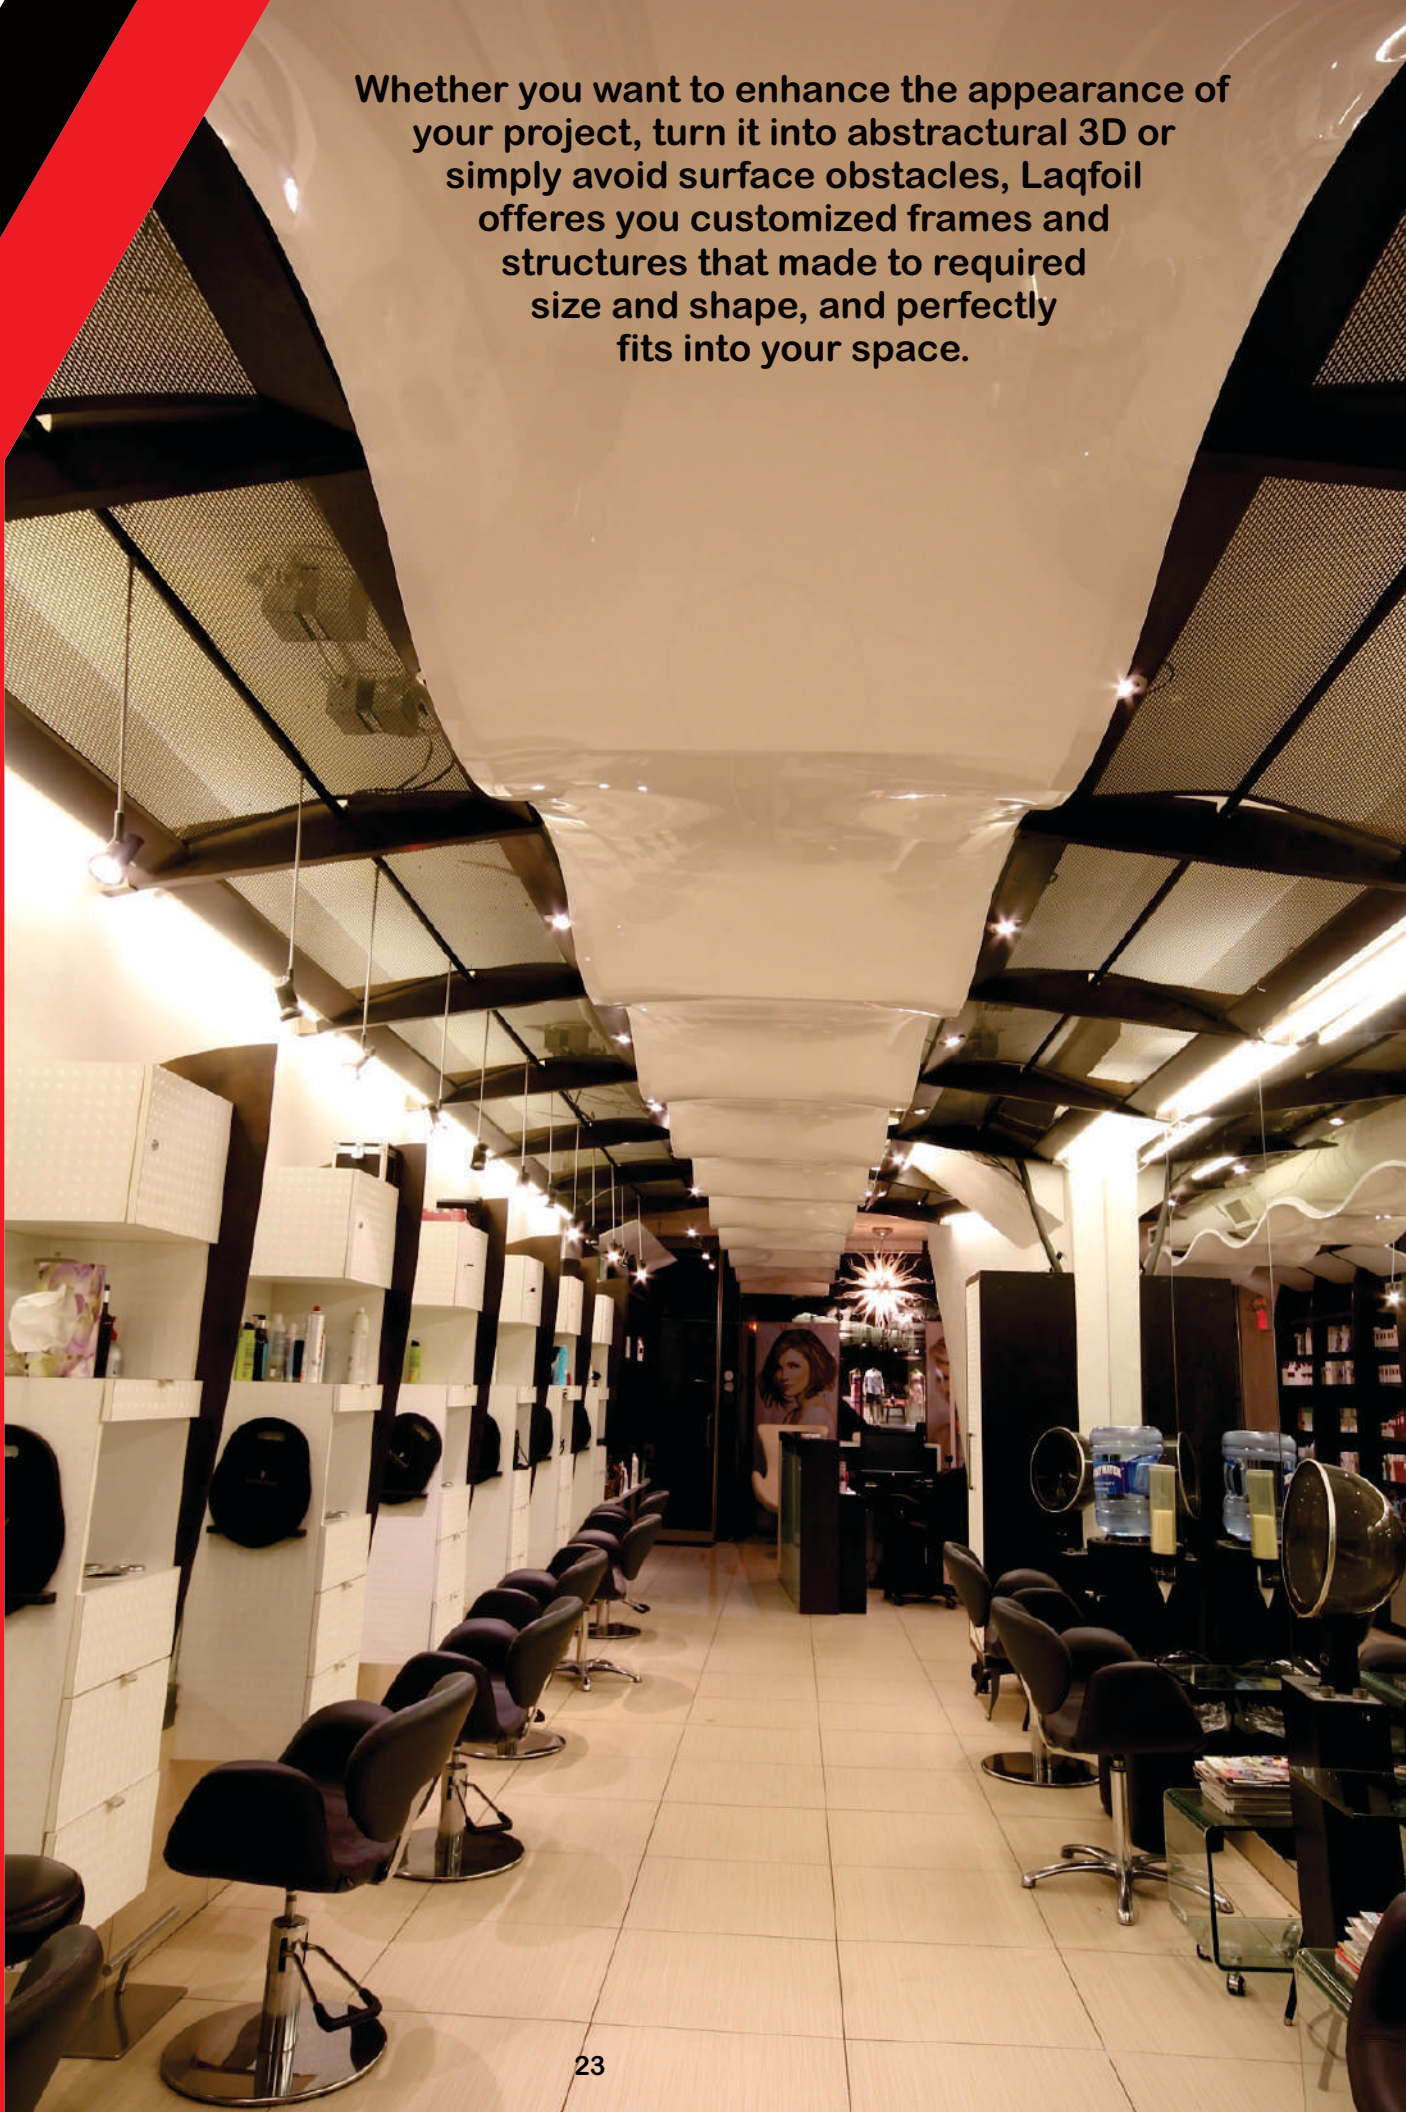

3D STRETCH CEILINGS

MODULAR STRUCTURES

Whether you want to enhance the appearance of your project, turn it into abstractural 3D or simply avoid surface obstacles, Laqfoil offeres you customized frames and structures that made to required size and shape, and perfectly fits into your space.

Customly created structures then finished in chosen membrane or printed artwork. Such structures can be backlit and installed vertically, horizontally or simply self suspended onto secured aircraft cables. All structures are made in light-weight, durable aluminium base and are limitless in options for shapes and design.

Exhibit booth, overhead 3D bulkhead, self hanging structure or a standing showcase could be a great benefit to your project.

Laqfoil provides full services for signs and banners industry.

From in-house design to printing, manufacturing and installation, you can get everything at one place.

Printed on exclusive, canvas based membrane, you can choose either high-gloss, matte or even translucent finishing with backlit option.

Up to 16' wide and 200' long banner, without seams, could be easily and quickly installed onto any surface, using simple, yet durable Laqfoi's patented framing system.
